Ali Yasser Ali

Penetration Tester

+20 115 139 3362 | ✉ aliyasser0115139@gmail.com | LinkedIn | Medium | Cairo, Egypt

Job Summary

Penetration Tester and active Bug Bounty Hunter with **25+ validated vulnerabilities** disclosed across enterprise programs on HackerOne, YesWeHack, and Intigriti, including financial institutions such as **Wells Fargo** and **DBS Bank**. Hands-on experience securing **regulated financial systems** gained through an internship at the **Egyptian Financial Regulatory Authority (FRA)**. Currently working as Penetration Tester, Instructor & Mentor at **ADA Egypt**, leading full-scope web, network, and Active Directory assessments and training security interns. Strong practical grounding in manual and automated testing, OWASP Top 10, API security, and red-team methodology.

Skills Summary

Testing Types	Manual Testing, Automation Testing, API Testing, Web App Pentesting, Network Pentesting, Mobile (Android) Pentesting
Methodologies	OWASP Top 10, OWASP API Security Top 10, PTES, Agile, Vulnerability Assessment, Threat Modeling
Offensive Tools	Burp Suite Pro, Metasploit, Nmap, SQLMap, BloodHound, Impacket, CrackMapExec, Nuclei
Active Directory / Red Team	Kerberoasting, Pass-the-Hash, DCSync, Responder, PowerShell Empire
Scripting & OS	Python, Bash, JavaScript | Kali Linux, Ubuntu, Windows Server
Other	OSINT, Recon, Reporting & Documentation, Compliance Reporting, Mentoring/Training

Experience

Penetration Tester, Instructor & Mentor Mar 2026 – Present
ADA Egypt (Academy of Digital Arts) *Cairo, Egypt*

- Lead full-scope penetration tests across web, network, and Active Directory environments for enterprise clients, identifying and helping remediate critical vulnerabilities.
- Design and deliver cybersecurity training covering web application security, exploitation techniques, and professional penetration testing methodology.
- Mentor a cohort of security interns, reviewing vulnerability reports and providing structured technical feedback.

Bug Bounty Hunter 2025 – Present
HackerOne · YesWeHack · Intigriti *Remote*

- Reported **25+ valid vulnerabilities** across enterprise programs including Twilio, Notion, Allegro, Wells Fargo, and DBS Bank.
- **DBS Bank** (YesWeHack) — Security Misconfiguration, CVSS 5.9, on a live banking platform; awarded monetary bounty.
- **Notion** (HackerOne) — Broken Access Control, CVSS 6.9; **Wells Fargo** (HackerOne) — validated finding on a major financial program.
- **Allegro** (Intigriti) — DOM-based XSS via DataDome WAF Bypass on a hardened enterprise target.
- Core focus: advanced recon, WAF bypass, parameter pollution, CORS misconfiguration, BOLA/IDOR attack chains.

Cybersecurity Intern – Financial Systems Security Assessment 2026
Egyptian Financial Regulatory Authority (FRA) *Cairo, Egypt*

- Conducted security assessments of 5+ internal financial systems, documenting vulnerabilities and delivering remediation recommendations to senior security staff.
- Supported enterprise security governance and compliance reviews aligned with national financial cybersecurity regulations.
- Produced technical risk reports translating findings for non-technical compliance stakeholders.

Education

B.Sc. Information Systems Expected Jun 2026
Modern Academy *Cairo, Egypt*

- GPA: 3.3/4.0 — Specialization: Web Security, Networking, and Applied Cryptography.

Technical Skills

Offensive Tools: Burp Suite Pro, Metasploit, SQLMap, Nmap, BloodHound, Impacket, CrackMapExec, Responder, Nuclei
Web & API Security: OWASP Top 10, OWASP API Security Top 10, XSS, SQLi, SSRF, IDOR/BOLA, CSRF, LFI/RFI, File Upload Abuse, CORS, WAF Bypass
Active Directory / Red Team: Kerberoasting, Pass-the-Hash, DCSync, PowerShell Empire
Mobile Security: Android APK Analysis, SSL Pinning Bypass
Financial & Regulatory: Financial Systems Security Assessment, Compliance Reporting, Egyptian FRA Standards
Languages, Scripting & OS: Python, Bash, JavaScript, PHP, HTML/CSS, Java | Kali Linux, Ubuntu, Windows Server
Recon, OSINT & Networking: Subdomain Enumeration, Google Dorking, Shodan, JS Analysis, TCP/IP, DNS, HTTP/S, Wireshark

Projects

Secure & Compliant ML Security Pipeline | *Graduation Project – Secure Deployment Lead* 2026

- Built a production-grade FastAPI inference service with OAuth2/JWT authentication and Azure Key Vault secrets management.

- Conducted a local penetration test of the deployed service aligned to the OWASP API Security Top 10 and produced a formal penetration test report and security architecture document.

Certificates

Earned: eJPTv2 (eLearnSecurity) | AppSec Practitioner (CAP) | Network Security Practitioner (CNSP) | CCNA (NTI)

In Progress: CRTP (In Progress) | CPTS (In Progress) | eWAPTX (In Progress) | eMAPT + eMAPT Black Belt + Hextree (In Progress) | CompTIA Security+ (In Progress) | ITI Pen Testing & DFIR (In Progress) | CyberTalents Bootcamp (In Progress)

Volunteering & Activities

Head Instructor, IEEE Cybersecurity Branch, Egypt — Delivered 5+ hands-on penetration testing workshops to 100+ students.

Founder, pwnSec — Cybersecurity YouTube channel producing practical penetration testing and CTF walkthrough content.

1st Place — CyShield CTF Luxor (Web, Forensics, Reverse Engineering), Mar 2026

7th Place Nationwide — Zinad × ITI CyberChampions CTF, Feb 2026

Finalist / Team Member (Sp3c0ps) — Connectors CTF (5th place), ICMTC 2025, CyCTF 2025
